

4 BENEFITS

of LTACH Partnership for Hospital Success

Long-term acute care hospitals (LTACHs) continue to demonstrate favorable outcomes in treating and successfully discharging high-acuity patients back home or to a lower level of care.

With the help of a seasoned LTACH partner, hospitals can begin to experience:

1 Shorter Length of Stay

LTACH integration through a strategic partnership enables a hospital to identify patients best suited for long-term acute care, therefore reducing less efficient treatment in other care settings.

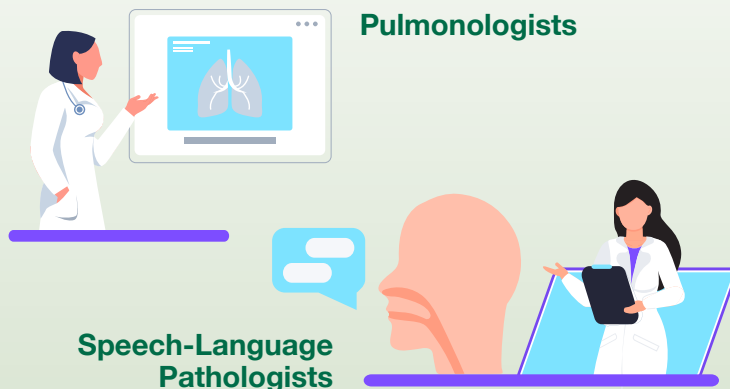

This is done through:

- Regular coordination with physicians and care managers
- Daily/weekly patient screenings with specially trained clinical liaisons
- Weekly patient performance review monitoring with a care management team

2 Decreased Readmissions to Acute Care Hospital

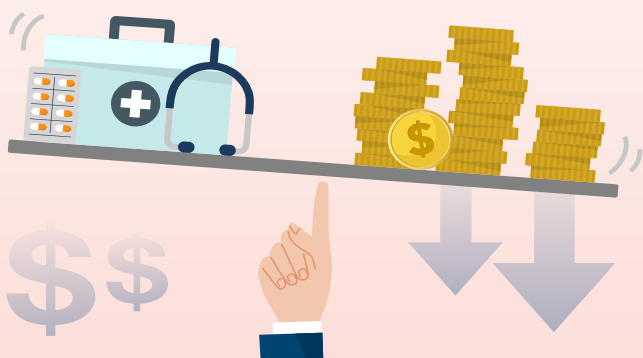

Having a partner with a robust team of national recruiters who are able to identify qualified candidates can improve patient outcomes – enhancing access to resources and specialized expertise.

3 Reduced Care Costs

LTACH integration can help reduce spending by improving care efficiency in the following ways¹:

- Specializing in treating patients with multiple comorbidities
- Integrating innovative technology
- Obtaining Joint Commission accreditations and special certifications

4 Improved Quality and Patient Satisfaction

LTACH partnership can improve access to specialized care for critically ill patients, helping them recover more efficiently, and increasing patient satisfaction.

Discover how your hospital can more effectively meet complex patient needs through LTACH integration. Visit KindredLTACHPartner.com today.
