## PREREQUISITES

MobileIron Mobile@Work must be installed on the device from the Google Play Store.

**NOTE:** *There is a chance that your data could be lost.*

If any personal data is stored on your device, it is recommended that you backup with Google before the update commences. (Settings > Accounts > Google)

If any photos/videos are stored on your device, it is recommended that you backup, the Google Photos service will store these items at no cost.

### DEVICE REQUIREMENTS

Android devices running 6.0 or later is required.

Android devices are required to be encrypted. (You will be prompted to encrypt during setup if your device is not currently encrypted. **This could take several hours to complete.**)

### PRIOR TO REGISTERING WITH MOBILEIRON

Kindred Healthcare prohibits rooted or compromised devices from accessing Kindred resources. To protect Kindred's resources, Kindred Mobility may wipe or remove these devices from MobileIron without notice.

### NOTE

The following steps/screenshots may vary based on your device and version of Android.

## CHANGES

### 1.1

Initial Release

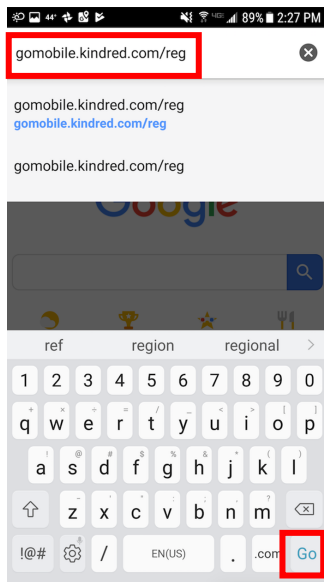

# MOBILEIRON REGISTRATION

## Step 1

Tap the **Internet Browser**.

## Step 2

Tap the address bar and type: **gomobile.kindred.com/reg**. Tap **Go**.

### Step 3

Read the User Agreement and tap **Close** in the bottom right.

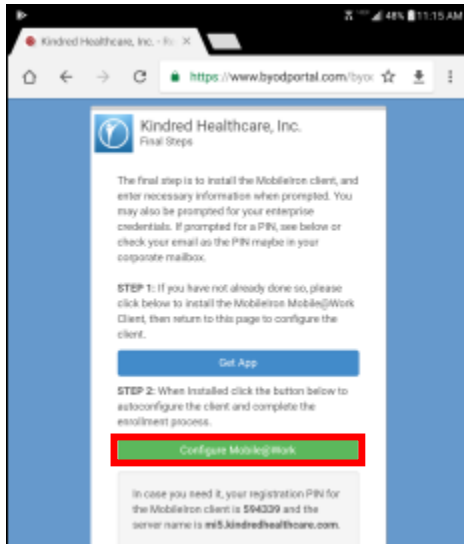

### Step 4

Enter your **Username**, **Password**, and select device ownership, then check the box: **"I Agree To The Terms"** and tap **Let's Register**.

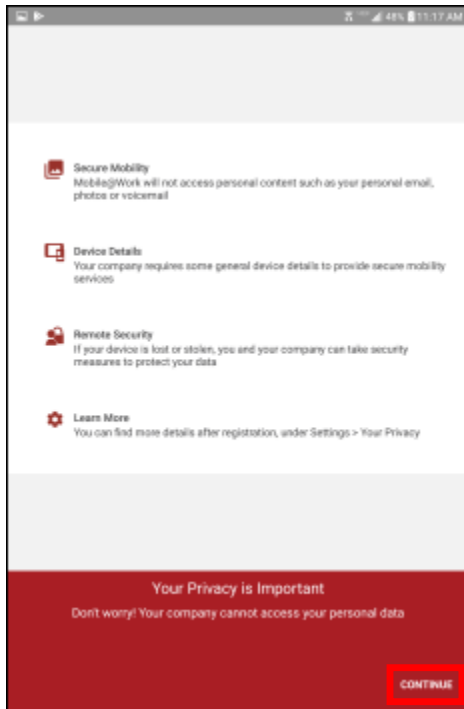

Step 5

If you need to install MobileIron, tap **Get App**, otherwise, tap **Configure Mobile@Work**.

**NOTE:** Write down the 6 digit PIN and the server name (they are in bold at the bottom of the page).

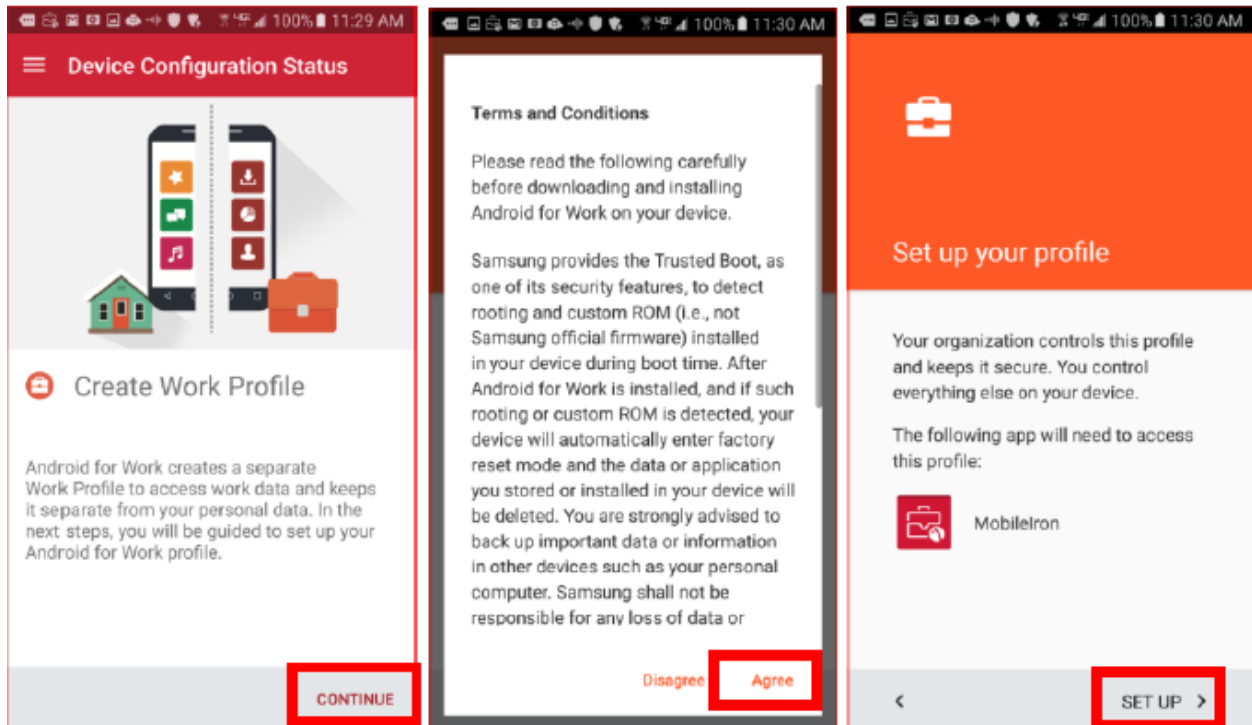

Step 6

Mobile@Work will open. Tap **Continue**.

Step 7

Tap Continue, Agree, then Setup.

Step 8

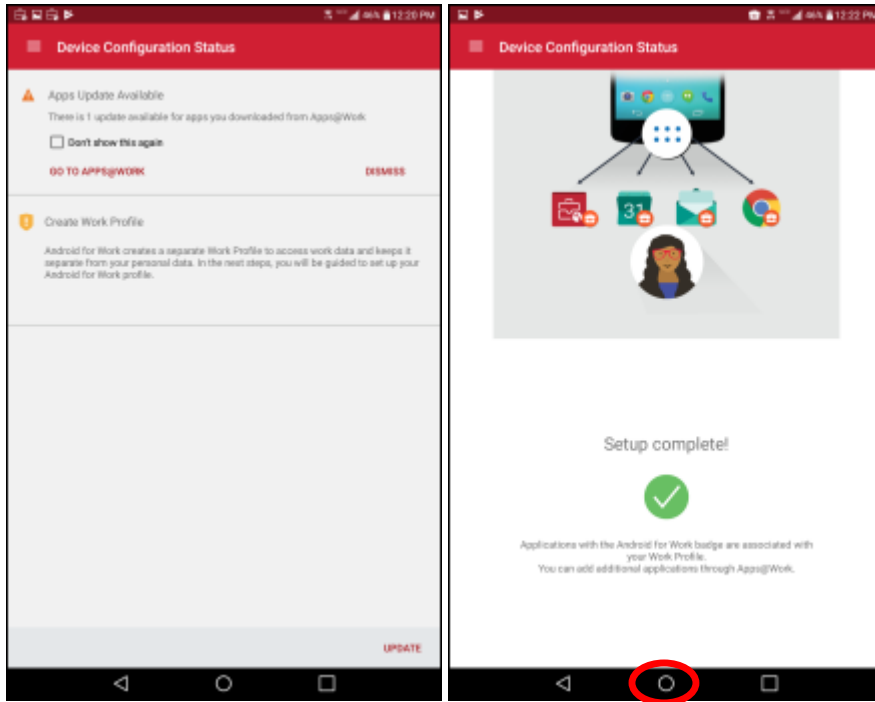

Tap OK.

**NOTE:** This could take some time to complete, please be patient and let the device complete the setup.

Step 9

If the screen above prompts to **Update**, no user interaction is required, as it will do this automatically. Setup of the device is complete. Press the **Home Button**.

Step 10

You will now find a **Work Folder** on your home screen with any apps you have access to. Tap **Mail**.

Step 11

The **MobileIron Email+** app will attempt to setup your mail account. Ensure the certificate bubble is highlighted and then select **Allow**. Email will begin to sync once email is configured on the device.

**NOTE:** Email could take up to 30min to sync, depending on how many emails you have and how fast the network is the device is connected to.
